

Wall Max

Wall Mounted Storage

The Wall Max allows for high density storage utilizing a simple wall mounted fixture.

Simplicity with Options

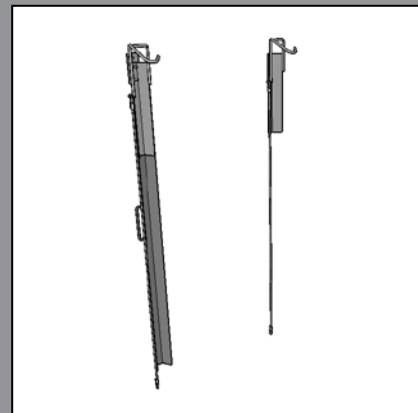

The Wall Max is a simple wall mounted hook and tray that holds the front tire of a bike. These can be mounted as close together as 12”.

Wall Max provides options to ensure it fulfills the needs of any bike room. It can be purchased as just a hook, a hook with extended tray to prevent tires from scuffing up the wall, and with or without security leashes.

The Wall Max also allows for high density storage on a wall. By staggering the racks, it allows bikes to sit close together without handlebars and pedals interfering with each other.

This rack can be used in combination with the “Bike Bin” to provide a clean consistent look throughout your bike room.

Please contact us for a dealer near you. Our dealers can assist with measuring, space recommendations, floor plans, and installation.

Wall Max:

- Mounts directly to a wall.
- Works for most bike tire sizes.
- Optional full tray prevents tires from touching walls.
- Works with bikes with fenders.
- Optional security leash available.
- Rack is only as strong as the surface it is mounted to. Knowledge of stud location is recommended.
